

**Dear customer, relation of T.O.F.F. BV**

**We are proud to present you a new concept and expansion within T.O.F.F. BV**

**“Green Vegan” Biocyclic Vegan products. In other words; completely vegan organic fresh produce.**

**But aren't all 'fruit and vegetables' and certainly the 'organic fruit and vegetables' vegan?! "No!" Find out why..**

# GREEN VEGAN

Green Vegan is an official distributor and member of the Biocyclic Vegan network. All products that we distribute through B2B channels are Biocyclic Vegan certified.

Biocyclic vegan agriculture is a purely plant-based and organic farming system. This cultivation method does not use production animals and does not use animal fertilizers. Emphasis is also placed on promoting biodiversity, healthy soil life, humus build-up and maximum closure of organic cycles.

Since November 2017, the Biocyclic Vegan Standard has been available worldwide as a global standard for vegan (vegan) and organic farming, accredited by the IFOAM Family of Standards.

For more information, please visit: <https://www.biocyclic-vegan.org/>

**Are you as a company also interested in these products? Are you a retailer looking for a complete range of Organic Vegan fresh products? Please contact us quickly and our team will inform you about the possibilities.**

**Green Vegan is an official distributor for Biocyclic Vegan products in the Netherlands, Germany, Belgium, UK and Scandinavia.**
